Subject: Re: TECFO 1994 Issue of Licences – Consultation 2023 Fishery

Dear Kent and Essex sea Fisherie committee

Please consider all vessels operating in

The TECFO area to be able to carry on board

3 spare blade s for the cockle dredge approved

By the Ifca officers part of the bio security form

. As we fish in the maplin ranges and we receive

Lots of damage to the blades when fishing .

This will lower our carbon c o 2 missions

To save steaming back to port just for blade

Change when damaged.

This will also keep damage rates down to

Protection of cockles with in distorted and

Or damaged tips .

Each dredge to be marked in stainless

Weld identification of vessel and dredge

Numbers On top of dredge skid channels

Both sides

Example 

Welded blade s may cause uneven surface

For cockle damage .

All blades on vessel to fit in dredge runners

Of approved dredge

Please consider this for the 2023 Fisherie
